ADHESIVE TAPES

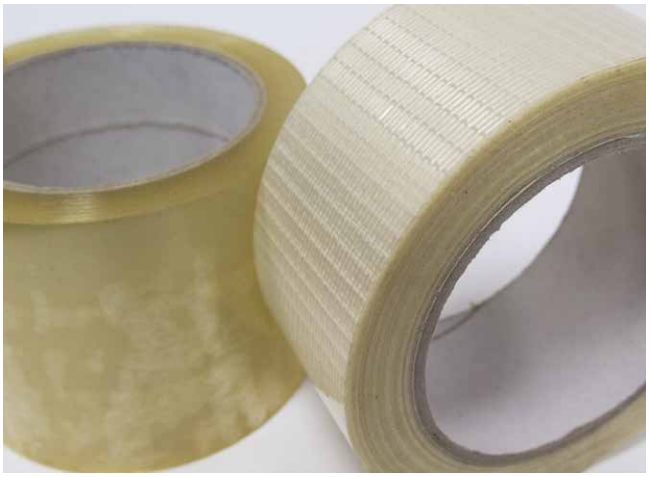

Our commitment has always been to offer products with high technical characteristics, providing optimal solutions to various packaging needs and ensuring safety and reliability in every circumstance. The traditional PVC adhesive tape offers the highest quality assurance and can meet any requirement. The PP (Polypropylene) tape is a highly robust product with excellent adhesion and silent unwinding. The dynamic characteristics of our tapes, such as tensile and rupture strength, are particularly high, thanks to the excellent quality of the materials used. Both PVC and PP tapes are available in white, brown, and transparent colors, and can also be personalized with your logos and company data in one or more print colors. We also manufacture reinforced adhesive tapes, which are widely used for bundling pipes and profiles. Additionally, we supply double-sided tapes for various needs, from mechanical and textile industries to small carton fixing.
