GARDENING ITEMS

In the gardening sector, the use of tags, labels, collars, and pin tags is essential as they help identify different types of plants and recommended treatments, such as the use of fertilizers, sun exposure, temperatures, sowing dates, species, and variety names. Therefore, it is crucial that our products withstand the test of time, ensuring that the correct treatment is always legible on the label. For this reason, we only select and use high-quality materials, suitable for extended use in challenging environments, with excellent resistance properties to abrasion, tearing, dirt, and weather. We provide specific items for each sector, from nurseries and horticulture to gardening centers and botanical gardens.
