STEEL HOOKS

In order to offer a complete service to our customers, we can supply different models of hooks and cotter pins in steel wire, burnished or galvanised. These fastening systems are essential for easy and immediate reading of displayed tags. Steel hooks are used for different applications, ranging from the classic attachment hook for tags with holes, to the new long hooks technically designed for producers of reinforcing steel. The wide range and robustness of our products represent the most effective solution for hanging and displaying any type of tag.
