LENTICULAR LABELS

These adhesive lenticular labels are printed in high definition and coated with special polyurethane resins that enhance the importance of your logo, both visually and tactually. Using molds, special materials, and adhesives, we create embossed lettering, emblems, and logos with custom-shaped raised elements of considerable thickness, achieving effects such as chrome, silver, and gold metal, as well as textures that replicate wood, fabric, marble, and non-smooth surfaces. Additionally, stunning effects with contrasts of matte and glossy colors can be created. These labels find applications in various sectors, from automotive to fashion, from technology to toys, transforming a simple label into an exclusive, indestructible, and elegant object, where design plays a central role in presenting and enhancing the product itself.
