PRE-CUT LABELS FOR LASER PRINTERS

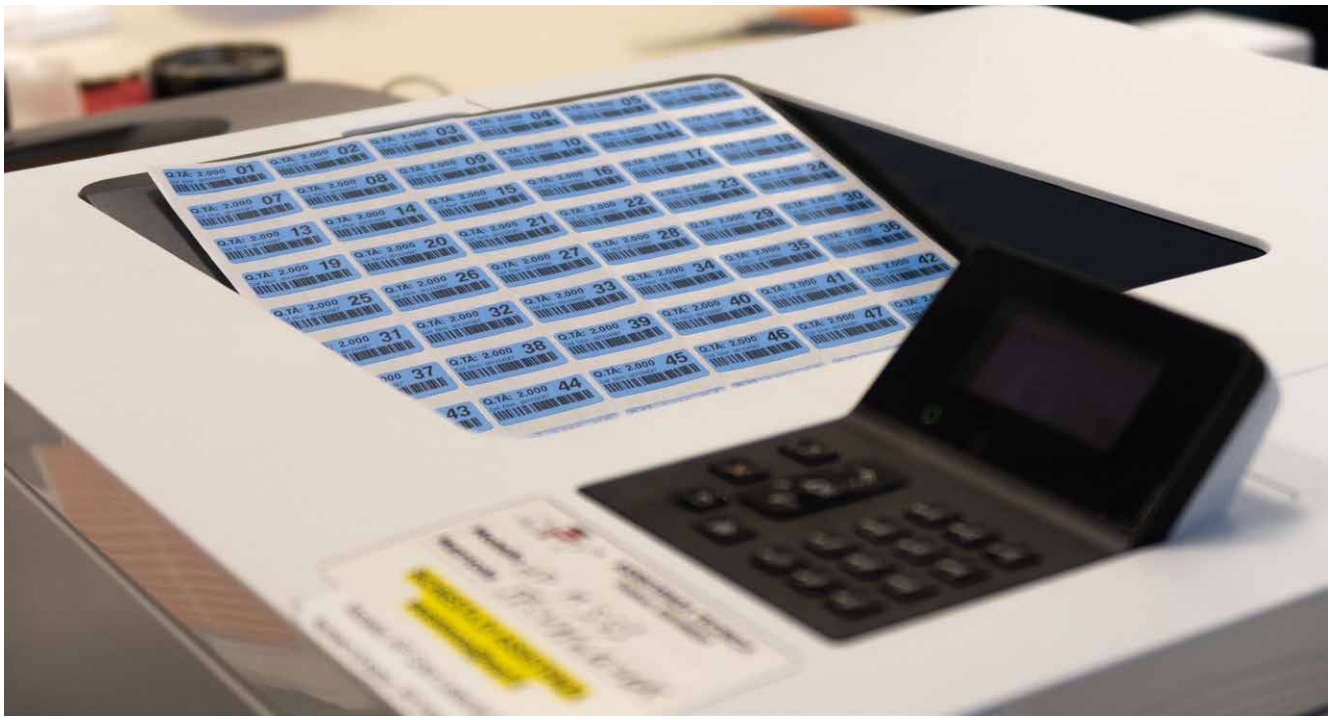

These adhesive labels can be made of paper or polyester and are produced in sheets in the standard A4 format (210x297mm), easily adaptable to any laser printer on the market. The use of laser printers offers significant advantages in terms of reliability and versatility, making them perfectly suitable for various work environments. On the A4 sheet, we can die-cut labels of any shape and size according to specific requirements. The option to print even a single label prevents unnecessary waste and keeps printing costs extremely economical. The best printing results are achieved by using original toners and printers equipped with good side guides to ensure the correct insertion of sheets into the printer.
